Contents of volume 61, 1999

Part 1

Report of the Editors—1998 *D. Firth and M. C. Jones* 1
Fractal analysis of surface roughness by using spatial data (with discussion) *S. Davies and P. Hall* 3
Understanding exponential smoothing via kernel regression *I. Gijbels, A. Pope and M. P. Wand* 39
Conformal normal curvature and assessment of local influence *W.-Y. Poon and Y. S. Poon* 51
Density and hazard rate estimation for right-censored data by using wavelet methods *A. Antoniadis, G. Grégoire and G. Nason* 63
Minimum aberration and model robustness for two-level fractional factorial designs *C.-S. Cheng, D. M. Steinberg and D. X. Sun* 85
A Bayesian restoration of an ion channel signal *M. E. A. Hodgson* 95
On the effect of overdispersion on exact conditional tests *T. A. Severini* 115
Empirical transform estimation for indexed stochastic models *Q. Yao and B. J. T. Morgan* 127
Intentionally biased bootstrap methods *P. Hall and B. Presnell* 143
Test inversion bootstrap confidence intervals *J. Carpenter* 159
Missing covariates in generalized linear models when the missing data mechanism is non-ignorable *J. G. Ibrahim, S. R. Lipsitz and M.-H. Chen* 173
Double-blind deconvolution: the analysis of post-synaptic currents in nerve cells *D. S. Poskitt, K. Doğançay and S.-H. Chung* 191
Exponential family state space models based on a conjugate latent process *P. Vidoni* 213
Prior elicitation, variable selection and Bayesian computation for logistic regression models *M.-H. Chen, J. G. Ibrahim and C. Yiannoutsos* 223
A nonparametric test for current status data with unequal censoring *J. Sun* 243
Perfect simulation of conditionally specified models *J. Møller* 251
Maximizing generalized linear mixed model likelihoods with an automated Monte Carlo EM algorithm *J. G. Booth and J. P. Hobert* 265

Part 2

Statistical studies of infectious disease incidence *N. G. Becker and T. Britton* 287
On the time to extinction in recurrent epidemics *I. Nåsell* 309
Gibbs sampling for Bayesian non-conjugate and hierarchical models by using auxiliary variables *P. Damien, J. Wakefield and S. Walker* 331
Discrete approximations to continuous univariate distributions—an alternative to simulation *A. Luceño* 345
The effect of Monte Carlo approximation on coverage error of double-bootstrap confidence intervals *S. M. S. Lee and G. A. Young* 353
Effect of frailty on marginal regression estimates in survival analysis *R. Henderson and P. Oman* 367
Inference in generalized additive mixed models by using smoothing splines *X. Lin and D. Zhang* 381
Parametric regression models for continuous time removal and recapture studies *D. Y. Lin and P. S. F. Yip* 401
Semiparametric methods for response-selective and missing data problems in regression *J. F. Lawless, J. D. Kalbfleisch and C. J. Wild* 413
Multivariate boundary kernels and a continuous least squares principle *H. G. Müller and U. Stadtmüller* 439

Weighted empirical adaptive variance estimators for correlated data regression
T. Lumley and P. Heagerty 459
Direct calculation of the information matrix via the EM algorithm *D. Oakes* 479
Corrigendum: Characterizing a joint probability distribution by conditionals
A. Gelman and T. P. Speed 483

Part 3

Bayesian nonparametric inference for random distributions and related functions (with discussion) *S. G. Walker, P. Damien, P. W. Laud and A. F. M. Smith* 485
The covariance inflation criterion for adaptive model selection *R. Tibshirani and K. Knight* 529
Polynomial regression and estimating functions in the presence of multiplicative measurement error *S. J. Iturria, R. J. Carroll and D. Firth* 547
Saddlepoint approximations for the difference of order statistics and Studentized sample quantiles *C. Ma and J. Robinson* 563
Statistical applications of the multivariate skew normal distribution
A. Azzalini and A. Capitanio 579
A simple derivation of deletion diagnostic results for the general linear model with correlated errors *J. Haslett* 603
Probabilistic principal component analysis *M. E. Tipping and C. M. Bishop* 611
An analysis of Swendsen–Wang and related sampling methods *G. S. Fishman* 623
Convergence of slice sampler Markov chains *G. O. Roberts and J. S. Rosenthal* 643
Biased bootstrap methods for reducing the effects of contamination
P. Hall and B. Presnell 661
A goodness-of-fit test for exponentiality based on the memoryless property
I. A. Ahmad and I. A. Alwasel 681

Part 4

Bayesian analysis of agricultural field experiments (with discussion)
J. Besag and D. Higdon 691
The achievable region approach to the optimal control of stochastic systems (with discussion)
M. Dacre, K. Glazebrook and J. Niño-Mora 747
Multivariate bandwidth selection for local linear regression *L. Yang and R. Tschernig* 793
Analysing competing risks data with transformation models *J. P. Fine* 817
Upper probabilities based only on the likelihood function *P. Walley and S. Moral* 831
On the construction of Bayes–confidence regions *T. J. Sweeting* 849
Bayesian inference for semiparametric regression using a Fourier representation
P. J. Lenk 863
Priors and component structures in autoregressive time series models
G. Huerta and M. West 881
On a class of m out of n bootstrap confidence intervals *S. M. S. Lee* 901
The complex Watson distribution and shape analysis *K. V. Mardia and I. L. Dryden* 913
One-step local quasi-likelihood estimation *J. Fan and J. Chen* 927
On confidence intervals associated with the usual and adjusted likelihoods
R. Mukerjee and N. Reid 945
Extensions of Fill's algorithm for perfect simulation *J. Møller and K. Schladitz* 955
Covariance structure of wavelet coefficients: theory and models in a Bayesian perspective
M. Vannucci and F. Corradi 971
Index of authors 987
Corrigendum: Second-order approach to local influence *X. Wu and Z. Luo* 990
